FIFTY-FIRST ANNUAL REPORT

OF THE

BOARD OF SUPERINTENDENCE OF THE
DUBLIN HOSPITALS.

WITH

APPENDICES FOR THE YEAR 1908-9.

TO HIS EXCELLENCY THE RIGHT HON. JOHN
CAMPBELL, EARL OF ABERDEEN, G.C.M.G.,

Lord Lieutenant General and General Governor of Ireland.

35, Dawson Street,

23rd July, 1909.

MAY IT PLEASE YOUR EXCELLENCY :

We, the Board of Superintendence of the City of Dublin Hospitals, have the honour to submit to Your Excellency this our Fifty-first Annual Report under Statute 19 & 20 Vict., cap. 110, passed on the 29th July, 1856, entitled Dublin Hospitals Regulation Act.

During the year ending 31st March, 1909, we have inspected all the Hospitals which receive grants from Parliament.

These are:—

1. Westmoreland Lock Hospital.
2. Steevens' Hospital.
3. Meath Hospital and County Dublin Infirmary.
4. Cork-street Fever Hospital.
5. The House of Industry Hospitals, viz.:
 - a. Hardwicke Fever Hospital.
 - b. Whitworth Medical Hospital.
 - c. Richmond Surgical Hospital.
6. Rotunda Lying-in Hospital.
7. Coombe Lying-in Hospital.
8. The Royal Victoria Eye and Ear Hospital; and
9. Royal Hospital for Incurables, which receives a portion of the Concordatum Fund.

Our inspections were made as heretofore without any previous notifications to the officials of the several Hospitals. On these occasions we carefully observed and inquired into the state and condition of each institution to ascertain that the wards were clean and well ventilated, that every provision was made for the treatment, comfort, and welfare of the patients, and that the several buildings were kept in good repair and in a sanitary condition. We made inquiries respecting the current expenses of each hospital and the system of purchasing, storing, cooking, and issuing supplies; we looked into the nursing arrangements, and into the means available in each hospital for the extinction of an outbreak of fire, and for the escape of the inmates in the event of such occurrence, and, in fact, into all such matters as might assist us in supervising these hospitals, and in reporting thereon in accordance with the provisions of the 18th section of the Act 19 and 20 Victoria, cap. 110.

With a view to carrying out these inspections in a systematic way, we have had drawn up a form of inspection report on which our opinions of the condition of each hospital are entered in detail. We have individually found this form useful not only as a means of directing one's attention to all essential points, but also as a paper on which to at once record one's impressions of the things passing under notice and seeming to call for comment.

In the appendix we set forth two sets of tables. One set tells of the work done, viz., the number and the nature of cases treated in each hospital during the year, the average number of beds occupied, the average time spent under treatment by each patient, the number of deaths. The other set has reference to the economic side of the question. Table No. 1 shows for each hospital its income and the sources thereof. No. 2 the average cost per bed for maintenance and for establishment and for both combined, but exclusive of buildings and furniture. No. 3 sets forth in detail the chief heads of expenditure. No. 4 the prices of each article supplied to each hospital per contract or otherwise. No. 5 gives the various dietaries in use in each hospital. There is also appended a form giving the names of the governors of each hospital and the number of their attendances during the year.

These returns show no marked change in relative expenditure from last year, and we are happy to be able to assure your Excellency that all the hospitals under our superintendence are managed in a thoroughly economic fashion, and that there is no one of them which does not, from an economic and charitable point of view, work well. While this is so it must at the same time be stated, that they are one and all in want of funds. There is not one of them in which some useful addition or change does not wait on the pecuniary means to carry it out.

Of course, the primary work of a hospital is the care of the sick admitted to its wards. This, as we have said many times, is admirably done in all the institutions with which we are concerned. But in addition to the intern-departments there are in all general hospitals out-patient departments subsidiary, but very important. To the part they play, the way

in which they do it, and their relation to other public dispensaries we wish on the present occasion to draw your special attention. To this part of the hospital two classes of patients come, those seeking admission into hospital, and those wanting only such treatment as can be given to them on the spot, or which can be carried out in their own homes. We need not point out to Your Excellency that the work done in the hospital dispensaries is of far reaching importance and concerns a large number of sufferers. These are, as a rule, a most deserving class. Persons anxious to remain at work, "to be kept on their legs," and to be on the rates as light a burden as circumstances will allow.

A question that insists on presenting itself to us is this: Was the treatment of these patients all that could be desired? Was it on a level with what the patients in the wards were receiving, i.e., on a level with the ideas of the present time? We think not. The day is gone when it was thought that a bottle of medicine, however cleverly prescribed, satisfied the requirements of the majority of cases. The great improvements in hospital efficiency, in the way of meeting the requirements of the situation, the cleanliness and even elegance so noticeable in the wards, and which, for many poor souls, make a brief stay in hospital an advance in civilisation as well as in health, have not in anything like the same degree been extended to the out-patient department. At the same time we attach no blame to the various hospital authorities. The state of the intern departments is proof of their capabilities and goodwill, and had they funds no doubt all parts of the institutions under their control would be on an equal level. However, this question of dispensary practice and what is necessary to bring it to an ideal standard is so important, especially now there is question of poor law medical reform, that we cannot pass it by in silence. It cannot be expected that dispensaries throughout the country will be worked in a fashion superior to that of the educational hospitals of the metropolis.

With more funds and more co-ordination much might be done. We note that in the Report of the Royal Commission on the Poor Laws and Relief of Distress, 1909, the majority, in their Scheme of Medical Reform, aim at the encouragement and organisation of existing institutions rather than their supersession. They fully recognise that there is at present much confusion and overlapping, that in some places there is a superabundance, in others a lack of medical relief, but they think that these defects may be largely overcome if there is some recognised authority charged with the duty of co-ordinating and supplementing the various agencies. The question is one of great interest, but it is not for us to enter into it in this report, except in so far as it concerns hospitals under our supervision.

WESTMORELAND LOCK HOSPITAL.

All connected with this institution seem to do all they can to make it a success. The patients are well treated, cared and fed.

A most thorough inspection showed us nothing to which exception could be taken, and the cleanliness and good order of the place struck our attention. We do not call to notice that it is in many ways antiquated. It has been so described by us on many occasions. It is a dreary place, from which one comes away depressed. A visit to it and to the Hospital for Incurables on the same day gives food for thought. In 1890 we stated:—"There is no doubt that if this hospital had been placed in a better and more salubrious position, and otherwise made more cheerful, its operations would be more successful than they now are." Of the 473 treated during the year 25 were sent to Magdalen Asylums; 4 to other hospitals; 11 to workhouses; 5 were taken on in the hospital as wardmaids; 5 as laundrymaids; 81 left contrary to medical advice; 18 were discharged for insubordination; 14 were restored to friends; 31 were sent to extern department.

STEEVENS' HOSPITAL.

A thorough inspection enables us to report that in this hospital, as heretofore, work goes on well. An old building, modernised in all essentials, and kept scrupulously clean, teaches lessons of adaptation, useful in a poor country. The expenditure on alcohol is high, and the attention bestowed on the out-patient department is good, compared with some of the institutions under our superintendence.

THE MEATH HOSPITAL.

This institution maintains the high standard of efficiency that has long characterised it, and, owing to the improvements noticed in former reports, is now in a better position than ever before to continue its beneficent work. We notice, therefore, with regret, that notwithstanding most economical management, its income is not equal to its requirements. A thorough inspection caused us to leave impressed with how much thoughtfulness, energy, and ability can do to smoothen difficulties.

CORK-STREET FEVER HOSPITAL.

Every department of this hospital is in a satisfactory condition, the patients are well attended to, and the order and regularity we found prevailing deserve high commendation. Since our last inspection many of the doors have been re-hung and made to open outwards, as recommended by Captain Purcell of the Fire Brigade. The new fire escape balconies seem an excellent idea for doing something towards safety in old buildings at a moderate cost. At the time of our inspection children suffering from whooping cough were out on them enjoying the sun. So they serve a double purpose.

HOUSE OF INDUSTRY HOSPITALS.

Dublin may be proud of this hospital. All that we have said definitely about it on former occasions we can repeat. We trust that the conspicuous ability that has achieved so much in the intern-department will now be brought to bear on the out-patient department, so that on visiting it one may exclaim, as one does in other parts of this institution, "how excellent!"

ROTUNDA LYING-IN HOSPITAL.

Since the opening of the New Wing, 1907, this hospital has, in a special manner, continued on a career of increasing usefulness. Its arrangements are in every way admirable. In the cost per bed, shewn in table No. 2, the cost of nursing extern patients is included. It should be noted that in this large institution the total sum expended on stimulants in the year was £3 8s. 5d., and that at the same time there have been improved results as regards recovery, etc. The means of escape in case of fire have been looked to under the superintendence of Captain Purcell, Fire Brigade.

THE COOMBE LYING-IN HOSPITAL.

We noted that at present "forward" seems in a particular manner to be the word guiding this institution. We made a thorough inspection, saw many improvements effected and others in progress. The out-patient department is about to be reconstructed, a most necessary change. Women who think that alcohol is necessary for them when they feel low should have the figures of this institution and the Rotunda brought to their notice. The total expenditure on alcoholic drinks of all kinds during the year was here £5 5s. 10d., at the Rotunda £3 8s. 5d.

ROYAL VICTORIA EYE AND EAR HOSPITAL.

This institution continues to work smoothly and well in all its departments. Its output of excellent repairs is very great. The number of visits paid by patients in the year was 38,000. We often wonder how many of the general public realise what the community gains in strength, what the ratepayers are saved, by well worked hospitals. Let anyone wanting an instance of economic expenditure compare the outlay on this institution with the work done in it.

ROYAL HOSPITAL FOR INCURABLES.

Great as is this institution, one would like to see it twice the size. Not one-third of the deserving cases applying can obtain admission. The good impressions of former inspections have on this occasion been renewed. Efficiency, brightness, determination to make the best of things remain its leading features, and remind one that "man is man and master of his fate." When

sanatoria are opened for tuberculous patients, we hope the beds now reserved for them will be set aside for incurable cases of cancer.

We have the honour to be

Your Excellency's obedient, faithful servants,

FRANCIS W. BRADY, BART., *Chairman*.

DUBLIN CASTLE,

10th August, 1909.

SIR,

I have to acknowledge the receipt of your letter of the 7th instant, forwarding, for submission to His Excellency the Lord Lieutenant, the Fifty-first Annual Report of the Board of Superintendence of the Dublin Hospitals.

I am,

Sir,

Your obedient Servant,

J. B. DOUGHERTY.

The Secretary,

Board of Superintendence of the
Dublin Hospitals,
35 Dawson Street,
Dublin.
